DAT DAO

Katy, TX, 77493 | (206) 488-6846 | daniel.dao229@gmail.com | https://www.linkedin.com/in/datdao229/

PROFESSIONAL SUMMARY

Versatile and results-oriented data professional with 7+ years of diverse experience bridging data analytics, analytics engineering, and business operations. Proven track record of architecting scalable ETL/ELT pipelines, building semantic data layers, and deploying enterprise-grade cloud automation workflows that mitigate financial risks and optimize operational scale. Master of Science in Data Science graduate with deep technical expertise across SQL, Python, Power BI, Tableau, and Alteryx, adept at translating complex backend data architectures into actionable executive insights.

TECHNICAL SKILLS

Programming Languages	SQL (T-SQL, MySQL), Python, R, DAX, Power Query, PowerFx, Scala
BI & Visualization	Power BI, Tableau (Server/Prep)
Data Engineering & ETL	Alteryx, Azure DevOps, SSMS, Hadoop, Apache Spark, Hive, Kafka, NiFi, HBase
Automation & Tools	Power Automate, Power Apps, Nintex Forms, Nintex Cloud Workflow, Jira, GitHub, SharePoint, Dataverse, dbt

PROFESSIONAL EXPERIENCE

Senior Analytic Engineer May 2024 – Present

Retech Advisors – McLean, VA

- Manage, optimize, and maintain production data within Azure environments, ensuring seamless end-to-end data flows and absolute accuracy through robust QA, ad-hoc data validation protocols, and A/B testing.
- Lead the architecture and optimization of relational data models, ETL pipelines, and automated processing routines utilizing Python, SQL, Fabric, and Alteryx to drive core ESG initiatives.
- Design and deploy interactive enterprise dashboards using Power BI and Tableau, enabling cross-functional stakeholders to track sustainability metrics and successfully integrating visualization assets into front-end web apps.
- Leveraged generative AI and LLM assistants (Claude, Microsoft Copilot) to design, automate, and optimize enterprise workflows, cutting operational bottlenecks and enhancing process throughput.
- Manage and analyze complex environmental, sustainability, and data metrics via EnergyStar Portfolio Manager for 60+ premier clients, protecting and optimizing a $2 trillion USD asset portfolio.

Senior Data Analyst / Analytics Engineer August 2021 – May 2024

Protiviti – Cincinnati, OH

- Engineered robust data governance frameworks and automated Power BI/Alteryx reporting pipelines for 10,000+ active job openings, mitigating $10M in potential data transfer errors and financial exposure.
- Architected and deployed an end-to-end vendor management application for 80+ suppliers by integrating Power Apps, Power Automate, Dataverse, and SharePoint to centralize communication and deliverable tracking.
- Streamlined legacy business processes by designing cloud workflows via Power Automate, Alteryx, and Nintex, successfully eliminating over 90,000 manual working hours annually across the enterprise.
- Executed advanced SQL script optimization, Python workflows, and rigid data validation transformations to ensure flawless data integrity for downstream executive business intelligence layers.

Principle Data Analyst July 2019 – July 2021

Bon Secour Mercy Health – Cincinnati, OH

- Programmed automated Python scripts and leveraged SSMS to extract, transform, and load (ETL) complex transactional data from Salesforce, Cisco, and Genesys into centralized SQL databases.

- Leveraged Tableau Server dashboards to analyze Call Center operational infrastructure, pinpoint customer needs, and monitor performance metrics for an organization of 400+ active agents.
- Optimized high-volume data structures, improving daily data quality, accessibility, and storage efficiency for a rapid operational scale handling over 30,000+ interactions daily.
- Resolved critical data discrepancies and preserved absolute database integrity across records for 7,000+ active healthcare providers.
- Constructed unified data flows pulling from disparate, heterogeneous data sources using Tableau Prep to establish a clean semantic data layer for Tableau reports.

EDUCATION

Master of Science in Data Science 2024
Bellevue University

BSBA, Management Information Systems (Minor in Finance) 2019
Southern New Hampshire University

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate - IP
- Microsoft Certified: Power Platform Fundamentals – April 2022
- Alteryx Designer Core Certification – June 2023
